Piani top in ceramica stratificati/accoppiati al vetro

Tops in ceramic layered with glass

I nostri piani in ceramica stratificata al vetro sono garantiti per sopportare pesi in appoggio sopra piano e ci permettono di eseguire ogni forma e misura.

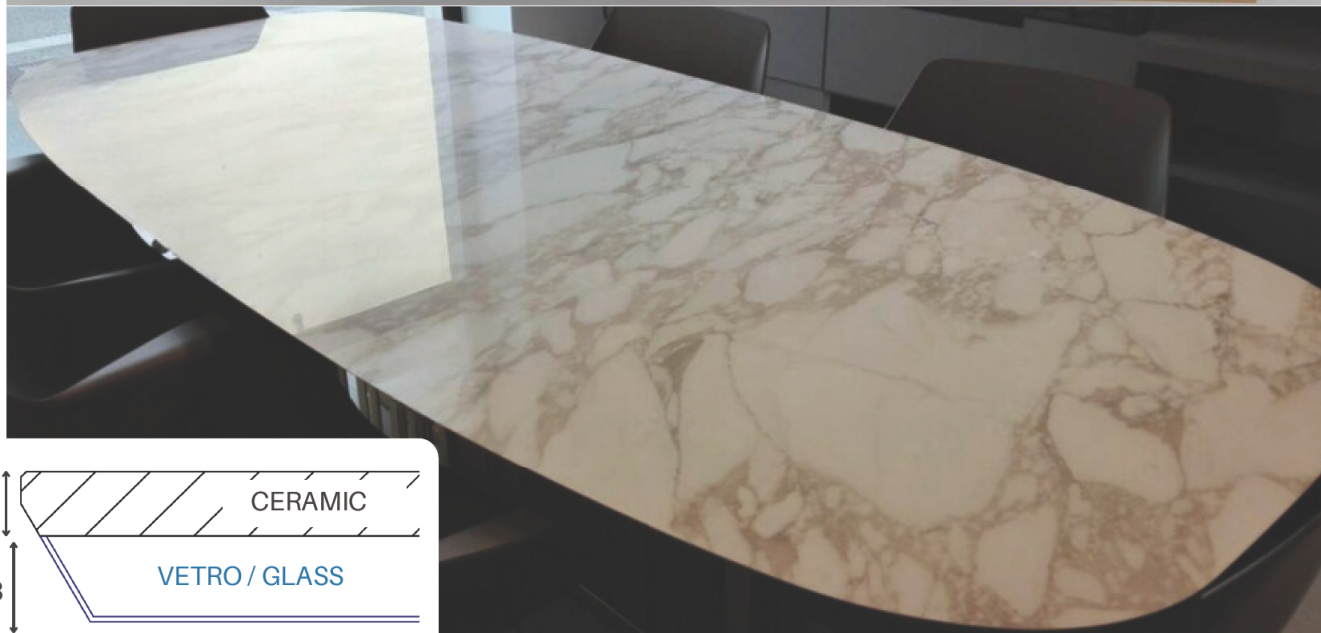

La stratificazione delle due lastre (ceramica+vetro) viene realizzata in appositi forni lasciando inalterata l'estetica della ceramica sul piano superiore.

L'unitura dei due materiali crea uno spessore totale di 14 mm (ceramica 6mm + vetro fumé 8 mm) che vengono poi lavorati sui centri di lavoro unitamente e con apposite mole inclinate per rendere meno visibile l'unitura stessa.

Our tops in ceramic layered with glass are guaranteed to support weights resting on the top and allow us to produce any shape and size.

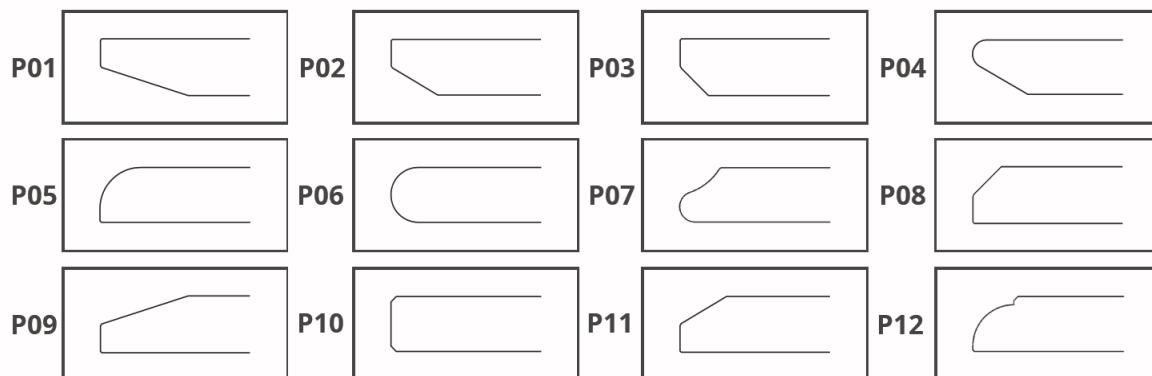

The layering of the two slabs (ceramic+glass) is carried out in special ovens, leaving the aesthetics of the ceramic on the upper surface unchanged.

The joining of the two materials creates a total thickness of 14 mm (ceramic 6mm + smoked glass 8 mm) which are then worked on the work centers together and with special inclined grinding wheels to make the joining itself less visible.
